EVEN.

(A German newspaper correspondent recently visited the fleet in the Kiel canal and in his report stated that "Even the food of the men was wholesome and abundant."

Sing ho, for the fleet in the Kiel canal,
Where every man is the kaiser's pal.
And lives upon beer and bread;
And they all have food, so help them

For every officer gets his fill—
And even the men are fed.

His beard as long as his hair is short,
Von Tirpitz says with a mighty snort,
"We've money and men and boats,
We're here to-day and we're here to-

Pass up the beer and drink death to
Why even our navy floats.

Behind the locks of our snug retreat,
We hurl defiance to Jellicoe's fleet,
From Rosyth down to Dover;
We look across at the wet, wet sea,
And we drink our beer till even we
Are almost half seas over.

Our men can eat, and they even drink
They walk and talk, and they almost

They can turn to the left and right;
And when we strike a blow in the back
Or sink a liner or fishing smack.
By Odin, they even fight.

—(Punch.)

COUNCIL MEETING

Regular monthly meeting of
the Village Council will be held
on Wednesday evening May 3rd

SCHOOL MEETING

There will be a meeting of
the ratepayers of the Monitor
School district on Thursday
afternoon, May 11th.

Debuture issue and other
school business will be taken up

The show put on by the George
Geisel Company, on Wednesday
night, was well attended con-
sidering the short notice given
of the show coming to Monitor.

A four act Comedy Drama en-
titled, "A wife's Peril," was
well rendered, with several skits
during the intervals between
the acts.

All present seemed well pleas-
ed with the evening's entertain-
ment. After the show a dance
was held.

Huns Captured in attempt to Land arms in Ireland.

London, April 24, 10.25 p.m.—
Sir Roger Casement has been
captured from a German ship
which attempted to land arms
in Ireland and was sunk. This
official announcement was made
to-night:

"During the period between
the afternoon of April 20, and
the afternoon of April 21, an
attempt to land arms and am-
munition in Ireland was made
by a vessel under the guise of a
neutral merchant ship but which
in reality was German auxiliary
in conjunction with a German
submarine.

The auxiliary sank and a num-
ber of prisoners were made among
whom was Sir Roger Casement.

Change of Train Service.

Beginning May 1st, 1916, Pass-
enger trains will run through
from Lacombe, Alta., to Moni-
tor, Alta., on same time as at
present between Lacombe and
Coronation, and from Coronation
to Monitor as follows:—

Leave (Daily ex. Sunday)
Coronation 17.50.
Throne 18.12.
Veteran 18.30.
Loyalist 18.47.
Consort 19.07.
arrive Monitor 19.30.
leave Monitor 4k.
Consort 4.23.
Loyalist 4.43.
Veteran 5k.
Throne 5.18.
Coronation 5.35.

Martial Law Declared

London, April 26.—Martial law
has been proclaimed in the city
and county of Dublin it was an-
nounced in the house of Com-
mons. Troops have arrived at
Dublin from Belfast and Eng-
land.

Zeppelins dropped 100 bombs

London, April 26.—100 bombs
were dropped by the Zeppelin
dirigible balloons in their raid
over England Tuesday night.
This announcement was made
by the official press bureau.
There were no casualties.

Four persons killed at Great Yarmouth by Bombardment

London, April 26.—Great
Yarmouth was bombarded as
well as Lowestoft by the Ger-
man warships which attacked
the eastern coast yesterday.
Four persons were killed and
twelve wounded.

50,000 Volunteers to enlist by May 27, or Compulsion follows.

Hereafter 15,000 men a week
are required until 200,000 un-
attested men have been obtain-
ed for the army.

Failure in any one week to
get required number will mean
Govt. will forthwith ask Parlia-
ment for compulsory powers.
This the outcome of Premier
Asquith's proposal at secret
session of House.

WANTED

Cattle wanted to range for the sum-
mer months. Length of season, May

LADY URSULA'S HUSBAND

FLORENCE WARDEN

Ward, Lock & Co., Limited
TORONTO

(Continued)

There was more decision than tenderness in his voice now, and Lady Ursula, after a moment's pause, during which she cast a swift look now at her brother and now at her husband, turned quickly and went into the adjoining room without another word.

Lord Eastling beckoned Payne to the corridor.

"Why not here?" said the other, assuming now a definite air of bored astonishment at these strange proceedings. "Surely you don't want us to hold a conversation in the passage?"

"I want to speak to you where my sister can't hear what I say," said Lord Eastling, coming nearer to the other, and holding him steadily with his eye.

He had laid a slight emphasis on the words, "my sister," and this gave Payne his cue.

"As your sister is now my wife," he answered with equal emphasis, but still very coolly, "surely it is for me to say whether she is to hear what you have to say or not?"

"I don't think you will say so when you know why I have come," said Lord Eastling. "At any rate, I won't speak to you where we can be overheard. So come along."

Paul affected to be intensely disgusted and irritated with this obstinacy, but he threw down his hat and, travelling on with more petulance than apprehension. He played the game to the end.

Lord Eastling led the way out of the room, and then turned to see that Paul was following him.

"Where are we going to?" asked Paul, in a hoarse voice.

"Down till we come to some room where we can talk," replied the other abruptly.

They descended to the ground floor, where Lord Eastling opened the door of a dark sitting room, turned up the electric light, and then faced the other once more.

Paul was still as cool as a cucumber.

"I wonder if we may smoke here," he said as he took out a cigar-case.

"Better wait till you've heard what I have to say,"

"Well?"

"I've come to take my sister back to England."

Paul appeared quite unmoved. He just raised his eyebrows.

"Will she, or?" he asked softly.

"Yes. When she knows what I know."

"Indeed. And what is that?"

"I've found out that you kept us a good deal in the dark as to your antecedents—Mr. Tomkinson."

They faced each other, and Paul did not flinch. He just raised his eyebrows. His attitude indeed, would have seemed superb in its indifference if Lord Eastling had not known of his attempts to avoid this meeting. As it was, he knew that all this was just "bounce," and that the man had had plenty of time to prepare his reception.

But his acting—if acting it was—approached perfection. He stared at the younger man as if doubtful of his sanity and then asked with perfect gentleness and courtesy:

"Why do you call me Tomkinson? My name is Payne. You know it is."

The younger man held his ground, although in spite of himself, he could not help feeling shaken by this complete self-command.

"I know that you call yourself Paul Payne now, but you were Tomkinson, Sydney Tomkinson—in other days," he ended, rather wearily.

Payne came over to him, and put his face, with its flashing, handsome dark eyes, close to that of the younger man.

"What other days?" he asked with

"Would you do something for a poor old sailor?" inquired a tramp at the gate.

"Poor old sailor?" said the workman's wife.

"Yes, m'm, I followed the water for sixteen years."

"Well," said the woman, "you certainly don't look as if you ever caught up with it!"

W. N. U. 1101

great abruptness.

Lord Eastling collected his wits. Then he spoke out boldly:

"In the days when you were known as a forger," said he.

It was strange that he should have felt doubtful about the man's guilt until that moment, and that it was by no conscious look in Paul Payne's face that he now felt sure the indictment was true, but only by a slight hardness of the man's voice.

"Can you tell me where I was convicted?" he asked drily.

"You've not been convicted—yet," retorted Lord Eastling boldly.

"And have you no fear of the law of libel, when you come to me with such a tale?"

"None. You know better than to bring an action. In the meantime, you must let my sister come back with me."

Lord Eastling took a step towards the door.

"Don't you think," cried out Paul Payne, in a languid voice, "that, if such a story as yours were true, your best plan would be, not to make a fuss about this rumor you have got hold of, but to hush it up, for the credit of the family, your family as well as mine?"

It's the same thing now, you know."

The young man turned upon him furiously.

"It is not," he said. "You have wormed yourself into our house by deceit and fraud, and now you must understand that the connection is at an end."

"And how do you propose to separate me from my wife?"

"I have only to let her know who you are, what you are, to show you to her in your true colors, and there will be no further question as to your position with her. My sister is a saint among women."

"Perhaps you don't know much about saints," said Payne quietly. "But anyhow, it's never too late to learn. Come upstairs with me, and tell her all this, and ask her what she's going to do."

He was so confident, so cool, that Lord Eastling doubted for a moment whether his own influence would be strong enough to overpower that of this handsome rascal, who seemed so convinced of his own powers.

And he dreaded the task of telling his sister of bringing such a wicked story to her in the midst of her radiant happiness in her love.

But it had to be done; and heavily, uneasily, he followed Payne back to the sitting room, where they now found Lady Ursula, her hat and coat off, sitting by the fire which had been hastily lighted.

It seemed to her brother as he followed Paul back to the room, that she looked more like a saint than ever, with her fair face a little drawn, a little sharpened, after the fatigues of the journey.

She looked up, innocent of any evil news, but puzzled still.

"Well, have you finished the famous talk?" she asked, putting out her hand on the sofa beside her, and leaning forward, with a smile hovering round her lips.

"Yes, my dear," said Paul gently. "We've quite finished. And now we've come to tell you all about it. My brother, Ursula, wants to take you away from me."

She sat up, staring dumbly at him. "To take me away," she echoed, wonderingly.

"Yes, dear. He says he has found out that I am a forger, that my name is something, I forget what, but not Payne anyhow. And he says he is going to take me back to England, and to prevent your seeing me any more."

She had risen to her feet, and for a moment she stood uncertain, staring first into her husband's face and then into that of her brother.

And some glimmering of the situation came into her mind, for she knew by the expression of anguish upon her brother's face that he at least believed the charge he had made.

For a moment she seemed to hesitate.

"Are you going with him?" asked Paul.

For answer she put her hands on her husband's shoulders, and looked up, brave and confident, into his face.

"No," she said. "I am your wife, Paul, I'll stay with you."

(To be Continued)

The Dutch people occupy a country which contains 12,630 square miles—little more than one-tenth of the size of Great Britain and Ireland, the population being just over 6,000,000. Holland is not only flat, it is hollow. Hence its name—"Hollow-land." Along the canals the meadows are 10 feet or 12 feet, sometimes more, beneath the waterline. By the sea, at high tide, there may be a difference in the level of the soil and of the ocean of quite twenty-five feet or more.

Two billions of lead pencils are made each year. Half of them are made of American cedar.

The Hold-over Flies

Swat the First Flies and You Will Have Less to Kill Later on

There are "hold-over flies" or "winter flies" which have been hibernating during the cold weather, and which wake up at the first warm sign of spring.

"Don't trust the cold to kill them," warns the North Carolina Bulletin. "Don't assume that the flies will be dead when you find them lying on floors or window sills in unused rooms. They are playing possum, and will recover when the temperature rises. Clean up the house and give special attention to every out-of-the-way place where flies may lurk. Make sure that there is nothing left which may harbor their eggs."

If you don't adopt this strategy, and start now, here is what you may be up against, according to the computation of experts:

A female fly surviving the winter may be expected to begin laying eggs in April. Her progeny will begin laying in May. Their progeny will be laying by June 1. We may reckon on five crops by the first of October. The first crop alone is big enough, but succeeding generations quickly run far beyond the grasp of the human imagination. If all the eggs hatched and developed into mature flies, the offspring of that one fly would amount, by Oct. 1, to the appalling number of 131,220,000,000,000,000.

That number of flies, it is said, if caught and pressed compactly together, would occupy a space of 250,000 cubic feet. That is to say, they would probably fill solidly, from cellar to attic, about ten ordinary houses.

Of course, the eggs don't all hatch, and the little larvae and pupae don't all grow up, and the adult flies don't all carry out this theoretical laying program. If they did, all other forms of life in the world would soon be buried under an overwhelming avalanche of flies, and all the foodstuffs in the world would be devoured by them. But the facts are impressive enough without this mathematical nightmare.

The moral is plain. Swat the first flies, and you'll have only tens to kill instead of tens of thousands.

Canadian Hardwood

Extensive Use of Canadian Wood by C.P.R. Pleases Lumber Interests

Not very long ago Lord Shaugnessy announced that so far as possible Canadian woods only would be used in connection with the construction and interior finish of all Canadian Pacific buildings, railway cars, etc., an announcement which was hailed with great satisfaction by the lumber interests of the Dominion.

That such a programme was possible was known to the forestry experts who have supplied to the various Canadian government exhibits in Europe, and the United States, magnificent samples of hardwoods with beautiful grains and attractive finish. It would seem that these woods are not being exploited sufficiently, but, no doubt, now that it is known there will be a good demand for it, manufacturers will give the matter greater consideration.

"What ruined your business?" "Advertising."

"How?" "I let it all be done by my competitors."—Boston Transcript.

First Tommy—Got toothache, "ave yer?" I'd 'ave the beggar out if it was mine.

Second Ditto—So would I if it was yours.

B.P. stands for Baden Powell. Known to every Boy Scout well. B.P. stands for "B.P." motto—Meaning therefore that you've got to be prepared for everything.

That the passing hour may bring. Be Prepared—Zing-a-zing, Bom-bom.

When with your patrol you start, Like a good Scout, clean and smart, Be Prepared with everything. Paper, pencil, matches, string, Water, knife, and hatchet—all ready for a sudden call. Be Prepared—Zing-a-zing, Bom-bom.

Be Prepared to play your part. When your daily work you start; Be Prepared and eager, too. Good and helpful turns to do; Be Prepared to conquer sin. By the grace of God with you. Be Prepared—Zing-a-zing, Bom-bom.

Be Prepared with heavenly grace. For the perils you must face. When your morning prayers you say. Draw your troubles for the day. Endless tribulation you're freed if "Prepared" be spelt P-R-E.

Be Prepared—Zing-a-zing, Bom-bom.

Austria Wants Peace

People Hate the Germans Almost as Much as Their Enemies

A neutral who lived many years in Austria relates the following impressions gained during a series of wartime journeys in Austria:

"The terrible effects of the war are at once visible on arrival in Vienna. The large restaurants, brilliantly lighted at night and resounding with the music of orchestras were almost empty. Occasionally a few boulevardiers strolled in to take place at the tables, but rarely to dine there. At Vienna on a day when the fall of krona was particularly accentuated, I was able to hear the lamentations of the public at the pay desks of various banks and the phrase constantly repeated: 'Germany has deceived us, Germany has lied to us.'"

"The constant news of victories spread by the Wolff Agency have no longer the desired effect upon the Austrian people. I heard the following remarks made by a high court official: 'If our armies were not so inextricably tied to the German armies we should have made separate peace long ago.'"

"Austria has in store for the Kaiser more than one surprise. For the moment, however, the Germans dominate the country and nothing more astonishing the 'Germanizers' in Austria than to find that their allies detest them almost as much as their enemies."

Animal World states that the total number of horses treated by vets. in the hospitals in France, up to the end of July, 1915, had been 81,134; of these 47,192 had been returned as cured, 4,266 had died, 4,843 had been destroyed, and 1,842 had been sold, while 22,991 still remained under treatment.

Note and Comment

Summer School for Teachers.

The growth of the attendance at the summer school from 75 in 1913, to 310 in 1915, has shown most clearly that it is meeting a real need on the part of the teachers of the Province.

The organization of the courses of instruction in organic relationship to the actual instruction which the teachers are expected to give in their schools and the extent to which the teachers are taking advantage of this opportunity for professional improvement are proving to be important factors in the strengthening of the work of the schools.

The effect of this supplementary training of the teachers in active work is becoming more and more noticeable each year according to the reports of the school inspectors.

All those teachers wishing to enroll for the summer school must do so not later than May 30th, 1916.

The Department of Education pays the railway fare, to and from Edmonton, of those attending the school from points within the Province. All must be registered by the fourth of July, the school term being from July 3rd, to August 5th.

Board and room has been arranged for at the University and will cost \$25.00 to \$30.00 for the school term.

Everything has been done to make this years term the best yet.

Recreation and social life will take up considerable of the time so that it will not be all work for those attending. Tennis, Baseball, Football and Basketball and week end excursions, will help greatly along this line.

The summer school can more and more become the annual gathering together for professional improvement of all those who are willing to actually contribute towards mutual upbuilding in personality, professional spirit and technical efficiency.

The Department of Education is to be congratulated for their efforts and success in providing such a school each year.

The exodus of German bankers from the fatherland, bearing with them as much of their capital as they can take away, is a significant sign.

What those bankers have they want to hold, and they are fearful of losing it if they stay.

Canada is spending a million dollars a day on the war, but a good deal of the money is coming back.

The largest load of logs ever drawn by a team of horses hitched to a sleigh, was recently hauled 15 miles from a lumber camp in Beltrami county, Minnesota. Six horses were required to haul the load, which consisted of 200 12ft. of logs, weighing 250 tons. When sawed up these logs produced 50,000 ft of lumber.

Two Toronto men paid \$50.00 each to dance a jig with Mrs. Vernon Castle. That's a long call from the time when they used to play the mouth organ, call off and dance, all at the same time.

An eastern professor says that of 4043 American millionaires whose biographies he has examined, all but 20 started in life as poor boys.

A lot of the poor boys that didn't become mighty useful to their country, too.

A British government order for 100 big howitzers from an American firm, to be delivered in 1917, makes it look as if the British didn't believe the war would soon be over.

It is now understood the latest submarine case is to be allowed to drop, and by and by the statute of limitations may govern.

It begins to look as though Greece must fight either with the allies or against them.

The German people have been fed upon victories since August 1914. When victories were not forthcoming they were given promises of victories. When other efforts proved futile, the desperate assault upon Verdun was begun.

Once started those responsible for its success dare not confess failure. German high commanders have no choice between victory and defeat at Verdun. It must be victory or a crumbling of German military prestige where it has most to lose, at home.

So the battle still continues.

If Villa is dead, of course there is nothing for the U. S. government to do but withdraw its troops from Mexico. They were sent there to pursue Villa and they can't pursue him beyond the gates of death.

Henry Ford the pacifist, is exploiting his opinions against national preparedness for war in full page advertisements.

He paid the Chicago Tribune \$887 for a single page of one issue, and the Tribune announces that it will hand over the money to the Navy league as soon as it is received. Thus Ford's money will help towards the preparedness which he denounces.

Couldn't Lend it to Her!
A small boy who was sitting next to a very haughty lady in a city street car, kept sniffling in a most annoying manner. At last the lady could bear it no longer, and turned to the lad.
"Boy, have you got a handkerchief?" she demanded.
The small boy looked at her for a few seconds, and then, in a dignified tone, came the answer:
"Yes, I have, but I don't lend it to strangers."

WISE HOSTESS

Won Her Guests to Postum

"Three great coffee drinkers were my old school friend and her two daughters.
"They were always complaining and taking medicine." (Both tea and coffee are injurious to many persons, because they contain the subtle, poisonous drug, caffeine). "I determined to give them Postum instead of coffee when they visited me, so without saying anything to them about it, I made a big pot of Postum the first morning.
"Before the meal was half over, each one passed up her cup to be refilled, remarking how fine the 'coffee' was. The mother asked for a third cup and inquired as to the brand of coffee I used. I didn't answer her question just then, for I heard her say a while before that she didn't like Postum unless it was more than half coffee.
"After breakfast I told her that the 'coffee' she liked so well at breakfast was pure Postum, and the reason she liked it was because it was properly made.
"I have been brought up from a nervous, wretched invalid, to a fine condition of physical health, by leaving off coffee and using Postum.
"I am doing all I can to help the world from coffee slavery to Postum freedom, and have earned the gratitude of many, many friends." Name given by Canadian Postum Co., Windsor, Ont.
Postum comes in two forms:
Postum Cereal—the original form—must be well boiled. 15c and 25c pkgs.
Instant Postum—a soluble powder—dissolves quickly in a cup of hot water, and, with cream and sugar, makes a delicious beverage instantly. 30c and 50c tins.
Both forms are equally delicious and most about the same per cup.
"There's a Reason" for Postum—sold by Grocers.

After the War Conferences
At the end of the war we shall clearly need to have two great conferences, one a conference of the belligerents to settle the territorial questions that concern them; the other a conference of all the powers, including the neutrals, to re-establish the law of nations on a sound basis, to mean for upholding it in time of war, and for ridding the world of the terrors of militarism even in time of peace. Let us always, in judging the doers now, we shall be able to work together, when the time comes, to save the world from a renewal of this savagery.—Westminster Gazette.

Manitoba Woman Sends Message

TELLS SUFFERING WOMEN TO USE DODD'S KIDNEY PILLS

Mrs. F. J. Garlis, Who Suffered With Backache, Says That the Results She Got From Dodd's Kidney Pills Were Wonderful.

Stewart Valley, Sask.—(Special).—Mrs. F. J. Garlis, wife of an estimable resident of this place, is enthusiastic in her praises of Dodd's Kidney Pills. "Dodd's Kidney Pills have helped me wonderfully," Mrs. Garlis says in an interview. "A year ago I was so laid up with my back I could hardly move. I took four boxes of Dodd's Kidney Pills and they helped me more than I can tell you."
Mrs. Garlis is now able to attend to her household duties as well as nurse her fine big baby boy and she feels that she cannot recommend Dodd's Kidney Pills too highly.

Backache is the bane of the average woman's life. It is accompanied by a weakness and lassitude that makes life a burden. But thousands of women all over Canada are telling their suffering sisters that relief and cure is to be found in Dodd's Kidney Pills. They cure the kidneys and nine-tenths of women's ills come from diseased or disordered kidneys.

The French woman who has received word of her husband's safety in a German prison camp, after writing 200 unproductive letters is a strong believer in perseverance and one of those who have profited by it.

REPLENISH YOUR BLOOD IN THE SPRING

Just now you are feeling "out of sorts"—not your usual self. Quite exhausted at times and cannot devote real energy to your work. Sleep does not refresh you and you wake up feeling "all tired out." Perhaps rheumatism is flying through your muscles and joints, or may be your skin is disfigured by rashes, boils or pimples. Headaches, twinges of neuralgia, fits of nervousness, irritability of temper and a disordered stomach often increase your discomfort in the spring.

The cause—winter has left its mark on you. These troubles are signs that your blood is poor and watery, that your nerves are exhausted. You must renew and enrich your blood at once and restore tone to your tired nerves, or there may be a complete breakdown. The most powerful remedy for these spring ailments in men, women and children is Dr. Williams' Pink Pills for Pale People, because these Pills cleanse bad blood and strengthen weak nerves.

New, rich, red blood—your greatest need in spring—is plentifully created by Dr. Williams' Pink Pills, and with this new, pure blood in your veins you quickly regain health and increase your strength. Then your skin becomes clear, your eyes bright, your nerves strong, and you feel better, eat better, sleep better, and are able to do your work.

Begin your spring tonic treatment today for the blood and nerves with Dr. Williams' Pink Pills—the Pills that strengthen.

These Pills are sold by most dealers, but do not be persuaded to take "something just the same." If you can get the genuine Pills from your dealer they will be sent you by mail, post paid, at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

"Father, what is a veterinary surgeon?"
"One of those fellows at the pension office, my son, who examines the veterans for pensions."

A Pill That Proves Its Value.—Those of weak stomach will find strength in Parmentier's Vegetable Pills, because they serve to maintain the healthful action of the stomach and the liver. Irregularities in which are most distressing. Dyspepsias are well acquainted with them and value them at their proper worth. They have afforded relief when other preparations have failed, and have effected cures in ailments of long standing where other medicines were found unavailing.

Join—The French have gained four hundred metres from the enemy. Auntie—How splendid! That should help to put a stop to those dreadful gas attacks.

Minard's Liniment Cures Burns, Etc.

Sailor (who has slipped on a banana skin)—Torpedoed, by gum.

New Trench Cannon
The British army has given another surprise to its enemies.
It has installed and is already using a most effective trench weapon which is absolutely deadly to adversaries, and being automatically aimed by a periscopic attachment, exposes those using it to no danger.

Give a reckless man rope enough and he will pawn it for a drink.

An Oil Without Alcohol.—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose the famous Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting. There is no medicinal oil compounded that can equal this oil in its preventive and healing power.

This is a good thing to look over and repair all machinery, harness, and fences.

Wise mothers who know the virtues of Mother Graves' Worm Exterminator always have it at hand, because it proves its value.

Crawford—If you go to war you're likely to be killed.
Crawford—While if you remain neutral you'll probably be torpedoes.

May we send you a copy of our new book, "Deserts and Candies"?

Dollars saved by Bovril

Bovril used in the Kitchen means dollars saved in the Bank.

It makes nourishing hot dishes out of cold food which would not otherwise be eaten. But see that you get the real thing. If it is not in the Bovril bottle it is not Bovril. And it *must* be Bovril.

No Dream
"Suddenly," said the man with a three days' growth of beard and an out of date necktie. "I found myself falling 400,000 feet into the depths of a bottomless pit."
"Dreaming, I suppose."
"No; just getting from under a corner in wheat."

Minard's Liniment for sale everywhere.

Some men are so cross grained in their disposition that it is all they can do to keep on good terms with themselves.

A Beauty Secret

To have clear skin, bright eyes and a healthy appearance, your digestion must be good—your bowels and liver kept active and regular. Assist nature—take

BEECHAM'S PILLS

Directions with Every Box of Special Value to Women Sold everywhere. In boxes, 25 cents.

"Mother Says We Couldn't Run The Farm Without

CROWN BRAND CORN SYRUP

IT'S downright scandalous, the number of 20 pound tins I buy. But, as Mother says, we use it for 'most everything. 'Nothing else tastes quite so good on all kinds of Hot Bread, Johnny Cake and Griddle Cakes. 'Mother uses it for all her cooking—for Cookies, Cakes, Gingerbread and Pies. 'And I am almost ashamed to mention the quantity of 'Crown Brand' bread that my youngsters consume. This syrup certainly is a favorite in my home."

The 20 pound tin is convenient and economical for home use, shipping weight 22 lbs. 8 oz. in 2, 5 and 10 pound tins. Ask your dealer.

MONTREAL, CANADA, BRANFORD, FORT WILLIAM.
Makers of "Lily White" Corn Syrup—Borden's Corn Starch—"Silver Glass" Laundry Starch.

YOU CANNOT AFFORD THE WRONG OIL

A GOOD lubricant in the wrong place is just as bad as a poor lubricant. For every part of every machine there is one right lubricant—and it is worth money to you to find it. It means less money spent for oil and a longer life for your machine.

The Imperial Oil Company makes a special oil exactly suited to every part.

STANDARD GAS ENGINE OIL

Recommended by leading builders for all types of internal combustion engines, whether tractor or stationary, gasoline or kerosene. It keeps its body at high temperature, is practically free from carbon, and is absolutely uniform in quality.

PRAIRIE HARVESTER OIL

An excellent all-round lubricant for exposed bearings of harvesters and other farm machinery. Stays on the bearings; will not gum or corrode.

CAPITOL CYLINDER OIL

The most effective and economical lubricant for steam engine cylinders; proven superior in practical competition with other cylinder oils.

ELDORADO CASTOR OIL

A high-grade, thick-bodied oil for lubricating the loose bearings of farm machinery, sawmills and factory shafting.

THRESHER HARD OIL

Keeps the cool bearing cool. Does not depend on heat or friction to cause it to lubricate.

STEEL BARRELS—All our oils can be obtained in 28-gallon and 45 gallon steel barrels. These barrels save their cost by eliminating leakage. You use every drop you pay for. Clean and convenient.

If your lubricating problem gives you trouble, let us help you. Tell us the machine, the make, the part—and we will gladly give you the benefit of our experience in selecting the proper lubricants.

Gin Pills FOR THE KIDNEYS What They Do

DAVISONVILLE, ONT.

"I had trouble with my kidneys and bladder so I got a sample of Gin Pills and followed directions. I felt better after the first dose and I kept taking them for a month."

One day, Mr. Simpson, of this town, told me about the trouble he had with his kidneys, and I recommended him to try GIN PILLS, and he gave him one to take. The next day, he brought some for himself, and both he and his wife have derived great benefit from them.

HERBERT H. BAUER.

Gin Pills are 50c. a box or six boxes for \$2.50 at all druggists. Sample sent free if requested.

National Drug & Chemical Co. of Canada Limited, Toronto.

LITTLE THINGS COUNT

Even in a match you should consider the "Little Things," the wood—the composition—the strikeability—the flame.

EDDY'S MATCHES

are made of strong dry pine stems, with a secret perfected composition that guarantees "Every Match A Light." 65 years of knowing how—that's the reason!

All Eddy products are dependable products—Always.

BLACK LEG

LOSSES SUPLY PREVENTED by Cutler's Black Leg Ointment. It is a sure cure for all cases of Black Leg, whether it be the result of a fall, a kick, or a burn. It is a sure cure for all cases of Black Leg, whether it be the result of a fall, a kick, or a burn.

SOUNDING LAKE

Mr. and Mrs. H. Deacon, were visitors at the home of Mrs. F. Ingersoll, on Sunday.

W. Adkin is busy these days hauling the material for the school.

Mrs. Adkin, Mrs. Somers and Miss. Adkin, were visiting Mrs. W. Muddle.

Pte. A. G. Deacon is a frequent visitor round the lake these days

Mr. G. Deacon was the guest of Mrs. Henman on Sunday last

It looks as though Jeff McKay was going to steal Antons' girl as they were noticed riding horse together on Sunday last.

Some of the boys are not satisfied with just one girl, they have to take three out at once.

There will be a Dance on Friday, the 28th, in the new Horse Shoe School, for of A! Walker and others who are leaving to join the 200th Battalion in Winnipeg.

CREEK VALLEY

The Evangelistic services are still being held in the school-house.

School is open again after the Easter holidays.

NOT YET.

We're living in a wondrous age
its like a fairy dream
To contemplate the works of
electricity or steam,
We can fly above the clouds and
we can swim beneath the sea
And speak to friend or foe, how-
ever distant he may be.

Unto toil we bid defiance,
As an easy pace is set,
By some marvellous appliance
But we aren't happy yet.

We have harnessed up the forces
that we do not understand,
And we hold them in obedience
even to a child's command:
The great mysterious universe
may hold its secret still,

But its powers are directed
neath the grasp of human skill
An existence so resplendent
Should be free from all regret
In a state that seems transcendent

But we aren't happy yet.
(Washington Star.)

Synopsis of Health Regulations

AS TO

Reporting Notifiable Diseases.

Householders who ascertain or have reason to suspect a person in his family or household or physicians who ascertain or have reason to suspect that a person whom he visits or examines, has any of the following diseases:

Smallpox, Scarlet Fever, Mumps, Glanders, Erysipelas, Rabies, Infantile paralysis, Cerebro-spinal Meningitis, Chickenpox, Typhoid Fever, Puerperal Fever, Cholera, Anthrax, Diphtheria, German Measles, Pulmonary Tuberculosis, Measles, Whooping Cough, shall within twelve hours give notice thereof in

writing—

(a) In cities, towns, villages or rural municipalities to the local board;

(b) Districts outside of cities, towns, villages or rural municipalities, direct to the Provincial Board;

(c) Local Boards of cities, towns, villages or rural municipalities are required within twenty-four hours of their being notified to send to the Provincial Board notices of cases of smallpox, scarlet fever, typhoid fever and diphtheria, occurring within their respective municipalities;

(d) Local Boards, on or before the 3rd day of each month, are required to make a return to the Provincial Board, showing the number of notifiable diseases (other than those mentioned under (c) which are to be reported (where indicated) occurring in their municipality during the preceding month.

These notifications are important from a statistical standpoint and also that the Provincial Board at once know centres of infection.

Blank forms for reporting will be supplied on application

T. J. NORMAN,
P.M.O.H. pro tem.

Professor Oncken, a learned German, reasons thusly:—
German people are naturally peaceful, the German army is composed of the German people therefore the army is peaceful in nature

It will not be denied that a million or more of the army with which Germany began the war are now peaceful, and very quiet under the soil.

Lumber.

Go to Galvin Lumber Yds. Ltd.
for it

Because we have a full stock of everything required on your building, and you get just what you want not what you can get.

Fresh carloads of Wood-fibre, cement, lime and brick just arrived.

Fence Posts

We have the best stock of Cedar and Willow fence posts ever seen in our city.

Beaver Board

A supply of Oak, including wagon tongues, always on hand for repairs.

Our aim is to have the best stock and the best customers
We have both.

ENORMOUS CROP FIGURES SHOW SASKATCHEWAN'S PROSPERITY

PRODUCTION INCREASES 600% IN ONE DECADE

Last Year the Province Raised More Cereals Than the Total Production of All Canada in 1900, According to the Latest Government Figures

In 1905 the province of Saskatchewan produced 46,612,139 bushels of grain—wheat, oats, barley, and flax—from an area of 2,638,281 acres. Ten years later the same province produced, according to the latest Dominion government figures, the same crops to the extent of 284,246,000 bushels from an area of 10,952,000 acres. In 1915 Saskatchewan raised 104,000,000 bushels of these cereals more than the total production of all Canada in 1900.

During one decade the crop production of Saskatchewan, of these four staples alone, increased over 600 per cent., while the area under crop to these cereals increased something over 500 per cent. And this covers only one branch of Saskatchewan's farming operations.

When reference is made to the great fertility of Western Canada it is sometimes met by the argument that as the country becomes older the fertility will greatly decrease, as has been the case in so many other countries. It should be remembered that the soil under the Canadian West is not the soil of the east. Prof. Shaw, one of the best known agronomists of the United States, after making an exhaustive study of the qualities of Western Canada, said:

"One acre of average soil in the Canadian West is worth more than 20 acres of average soil along the Atlantic seaboard. The man who tills the former can grow 20 successive crops without much diminution in the yields, whereas the person who tills the latter, in order to grow a single remunerative crop, must pay the vendor of fertilizers half as much for materials to produce an acre as would buy an acre in the Canadian West."

But let us not try to prove the point by theories. Here are facts:

In 1905 the wheat crop of Saskatchewan averaged 23.9 bushels per acre. In 1915 it averaged 28.54 bushels per acre.

The oat crop of Saskatchewan in 1905 averaged 42.70 bushels per acre; in 1915, 53.67 bushels per acre.

Barley, 1905, 27.11 bushels per acre; 1915, 36.83 bushels per acre.

Flax, 1905, 15.71 bushels per acre; 1915, 23.50 bushels per acre.

It will be noted that, except for flax, 1915 shows a substantial increase per acre over 1905, and this notwithstanding the fact that the 1905 crop was one of the heaviest ever reaped in Saskatchewan.

It is not contended that the permanent prosperity of Saskatchewan is to be built upon grain raising. The most fertile soil in the world can be exhausted if the potatoes are raised long enough. But, as has already been said, grain raising covers only one branch of Saskatchewan's farming operations. Look at the live stock statistics:

In 1906 there were 240,566 horses in Saskatchewan. Now there are 667,447. In the same period the number of cows in the province have increased from 122,618 to 348,540, and other cattle from 360,236 to 573,021. Sheep have increased from 112,290 to 192,614, and swine from 113,916 to 329,246.

In 1907 there were seven cheese factories and 12,000 pounds of butter in Saskatchewan. They produced 15,000 pounds of cheese worth \$1,560 and 132,803 pounds of butter worth \$36,599. Returns for 1915 have not yet been recorded, but the 23 creameries which have reported produced 3,831,300 pounds of butter valued at \$1,059,443. They produced 112,290 pounds of milk to a value of \$379,152—more than 10 times the total value of their butter production only eight years ago. Moreover, they have established a reputation for Saskatchewan butter on the market, which has resulted in a demand that is practically inexhaustible. In 1915 52 carloads of butter were shipped out of the province, and the industry is just in its infancy.

These figures are sufficient to prove that Saskatchewan's prosperity is a very real fact, and that it is part and parcel of the agricultural development of the province. It is true that Saskatchewan has other industries which have contributed to the general prosperity, but it will be found that they are closely related to agriculture, and the success of the farmer has made their success possible. While at the same time they have contributed to the farmer's prosperity by enlarging his home market or providing his necessities. For instance, the province has an annual lumber cut of approximately 250,000,000 feet. This output affords a valuable local source of supply to the farmer, while at the same time the men and teams engaged in the industry consume his flour, oats, butter, eggs, milk, vegetables, meat and hay. The province's railways represent an income of \$150,000 a year, and of course it is impossible to record fish taken by farmers from countless lakes and streams for their own use.

Saskatchewan has a yearly production of about \$800,000 worth of

minerals, mainly coal, which is largely consumed by settlers in the district in which it is mined. Even manufacturing has made a start in the province, and now distributes wages amounting to over \$2,000,000 yearly and produces finished products valued at over six millions.

Railway development has been closely associated with agricultural development. Steam railway lines in Saskatchewan have increased from 2,081 miles in 1906 to over 5,000 miles at the present time. With railway development have come cities, towns, and villages, supporting a large population every one of whom is directly or indirectly associated with the agricultural interest of the country, and shares in the general prosperity due to the agricultural development.

Remarkable as has been the progress of Saskatchewan during the last decade, there is every reason to believe that the province is now only on the threshold of its prosperity. The disadvantages of pioneer days, the isolation, the lack of telephone service, good roads, schools, churches and markets, have been largely swept away. Years of experience, both by individuals and corporations, and governments, have added enormously to the agricultural knowledge of the country, and now the settler with a certain desire to learn can quickly acquire the information necessary to success. Agriculture in Saskatchewan is no longer an experiment. Both in quality and quantity the products of the province are now big factors on the markets, not only of Canada, but on the world. And all this has been accomplished with 11,000,000 acres under crop out of a total of 53,000,000 acres in the province, suitable for agricultural purposes.

Horse Sense

Ability to Manage a Primary Requirement of the Successful Farmer

In Farmers' Bulletin 704 is an interesting section entitled, "Horse Sense," from which we quote as follows:

"Without horse sense there's a poor show for making a real money success of any kind. Without that faculty, otherwise called 'business ability,' industry, capital, credit, and knowledge of the most approved scientific methods of agriculture, all will be of little avail. To qualify as a farmer, the farmer must be able to shape his work and change his plans according to changing weather, shifting markets, and fluctuating prices. He must be able to decide whether he can best dispose of his crop by feeding, or by selling on the market. In selling live stock or grain, the farmer must know enough of the actual value of his product to know when the local buyers are offering him a fair price."

"It is not enough to grow a good crop, or even to grow a good crop at a low cost. To make the big crop a business success, it must be disposed of at a profit. It is growing must be so graded and packed as to meet market standards, and so marketed as to bring the farmer the highest current price."

In other words, managerial ability is a primary requirement of the successful farmer. As a rule, the farmer of today has a very practical and efficient idea of how to produce the crops. Through his experience, reading and observation he has acquired a very considerable store of knowledge regarding the best methods of cropping and feeding. Marketing rather than production is his perplexing problem and until that problem is solved, horse sense or business ability, is joined with the results of observation and experience. It will not be solved.

British Soldiers Love the Water

At a meeting of the members of the Institute of Sanitary Engineers in England, Lieutenant R. R. Hebb, who is in charge of the Sanitary Work at the Front with the Expeditionary Force, said in no previous war had the sanitary organization been so important. He said that the sanitary work at the front was a matter of life and death, and that it was a matter of common sense to have a sanitary organization at the front.

In France the canals were great places for the sanitary work, and it was an uncommon sight to see hundreds of soldiers in the water at one time. It was also common to see notices posted in the water, such as "No swimming," "No bathing," and "No drinking." The water belonged to a certain unit, and elaborate diving boards attached to the sides or rafts tied to the banks, and even goalposts and nets for water polo.

One scarcely ever saw a civilian in the water, but there were usually a considerable number on the banks looking on with amazement and an expression which almost said, "The mad English."

The Farm Help Question

Pay Liberal Wages and Provide Home Comforts

Mr. Wm. D. Platt, in a very interesting letter to the Breeders' Gazette, takes up the help question for the farmer and tells how he thinks it can be solved. He says:

"Before laying my pen down I must make one remark that applies to this North American continent. We require more farmers, more farm help, more girls suitable for farmers' wives, and more domestic help. If the farmers of this continent will do as Great Britain has done, provide married men with homes on farms, assist them to live cheaply by giving them milk, potatoes, beef, pork, and eggs at reasonable prices, they will produce families from which will come boys who know how to farm and girls who can help the boys make a success. We shall then develop efficient, contented help. We cannot run a farm to its full capacity without improved live stock. We cannot run a farm without sufficient and cheap help. We must have more than we can run a factory successfully that requires skilled help by attempting to place children at the machines. If we have a sufficient number of young men of today that offers a greater inducement than agriculture, coupled with improved live stock."

Let us suggest in this connection that it will pay well for the farmer to give good men liberal wages and good, comfortable home conditions. Then, besides, not get rid of the notion of drifting around from place to place. When they strike a good man they should stay by him as long as possible.

The Brown Mou

Dealing With Improved Methods of Teaching in Rural Schools

The above caption is the title of a novel, written by Herbert Quick which attempts to awaken the rural communities to the antiquated courses of study in the rural schools and to point the way to the kind of schools that should be provided for the boys and girls in the country. The book also sets forth the difficulties met when a teacher or anyone else attempts to change the courses of study in our country schools. The presentation of the country school problem in the form of a story gives to this subject a different interpretation and we trust it will arouse sufficient interest in these guarding the destinies of the country schools to lead them to provide more suitable courses of study.

We have long realized that the country schools are in a bad way, serving their districts with the greatest efficiency. The courses offered by many of these institutions are obsolete, and the teachers are not equipped with the requirements of the ideals and standards of the present century. There is no good reason why so many of the country schools should meet as sum as an eyer upon the subject of agriculture. So far as they are concerned, they might think there is no such thing as a country school. We would not belittle the fundamentals in our educational system, but these fundamentals must be improved by incorporating in the courses of the country schools a few subjects pertaining to agriculture. If done in the right way, the agricultural subjects would add materially in teaching the fundamentals, as every boy and girl in the country has a knowledge of the life of the farm which can be readily used for illustrations and examples.

Mr. Quick points out the injustice done the boys and girls of the rural schools by not having the courses of study better adapted to their needs. We share in this opinion and hope the time is not far distant when those who are in direct charge of the country schools will see their duty and then have the courage to do it.

We Need Science

Scientific Industrial Organization is Needed by Britain

Lack of adequate scientific equipment, coupled with lack of enterprise and adaptability, have been almost the sole causes in the past of the failure—where it has fallen—of the British manufacturer and the British industry in the struggle with foreign rivals. No instructed person will say that the fault has lain entirely with the British merchant and the British manufacturer. It has not. The government can and ought to do much more than has been done in the past to maintain and push British industries. The banks can do much. The universities can do much. And all of them working in conjunction with the employer and the employee can do much. It is not realized that the commercial triumph of Germany has been due to her scientific industrial organization. It can only be stated that the British scientific organization is equally complex and scientific.—London Daily News

Wife—You know, Henry, I speak as I think.

Hub—Yes, my love; only oftener.—Topeka Journal.

Every man must put on the boxing gloves with fate, whether he likes a scrap or not.

BRITAIN MUST SECURE CONTROL OF AIR AS WELL AS THE SEAS

POTENTIALITY OF AIRCRAFT HAS TAUGHT LESSON

The History of the War Shows That Great Britain Must Create A Second Navy to Rule the Winds as the First One Does the Waves

State of Life in Berlin

Palace Windows Are Broken During Furious Rioting

A lady who has resided in Berlin all her life has just reached Manchester. Interviewed by a representative of the Daily News, she stated that the people in Germany do not have the slightest conception of the life of the people in the German capital.

"Only a fortnight ago," she said, "I saw the Kaiser. He is quite a different man from what he was. He looks just an old broken-down man. His cheeks are fallen, he is deathly pale, and his hair is quite grey. I thought the notion that he is suffering only from severe cold is carefully kept up, it is generally known that the Kaiser is suffering from cancer of the throat. He now lives at Potsdam when not at one of the other fronts—or, rather, reported to be there. The reason for his avoidance of Berlin will be quite obvious when I explain that the mobs have broken almost every window in the Palace there."

There were sinister rumors as to what happened to the crowd guilty of this enormity—people being shot down indiscriminately. She had been unable to test their accuracy, as now even regular German residents were not allowed free course in the streets.

"Rioting is now," she continued, "of daily occurrence, the people especially resenting the fact that they are not allowed now to purchase more than a quarter of a pound of butter or fat at the streets."

"The Kaiser is now never cheered. When he passes through Berlin it is in a closed motor, preceded and followed by other motors filled with soldiers and officials armed to the teeth."

"So far as business is concerned, Berlin is a dead city. Almost all the wholesale houses are permanently closed. The others are only open two days per week, and sell at a profit before they sell any goods, and the officials see that nothing is allowed to go out likely to be of service to them. The price of everything has gone up terribly," she continued.

One of the most significant changes she had noticed was in relation to the munition works, which formerly ran day and night, but now only worked irregularly. Employees questioned as to the cause of this were depressed as time passed. The price of everything has gone up terribly, she continued.

"This," she remarked, "is beginning to tell on the people, who are becoming more and more depressed as time passes. In Berlin the people openly clamor for peace. I have heard the cry frequently in the city. For God's sake send us peace at once. People are allowed to enter Berlin from the districts say the same thing is observable elsewhere."

Reports of rioting in England are circulated from time to time. Such were the reports circulated, that when she reached this country, she was amazed. She expected to find the towns in ruins and the people either starved or enslaved.

"The great mass of the people now," she added, "are the despair of hearing England, and the soldiers who are sent back wounded tell the most harrowing stories of shortage of munitions and food."

The Economy of Good Roads

New Life and Energy Put Into Community Through Good Roads

In a certain community the people were certain that they could not afford good roads. Through mistaken ideas of economy they dragged through ten mud more than half the year. The effect of the bad road was disastrous. Young people of spirit and enterprise left the community, going to cities or to other states to make their homes. Social life was well-nigh impossible because farm homes were linked together only by hideous depths of clinging mire.

The roads so affected those who lived by them and travelled them that the whole community took on the air of sadness and depression. Then there came a man who had lived in a region of good roads, a man of faith and enthusiasm. He began with the road drag to smooth up and let the water off a stretch of road. As it got better he dragged it again. He said that he had only a single light buggy he could go swiftly and easily to the village for the mail. Men were incredulous; they said that he was crazy. He went on and on. They waited; the man dragged again; his road kept hard and dry, like a racetrack. Then others believed. They began to drag their own roads. A little calculation revealed that a dollar's worth of horse energy spent in dragging the roads would save a dollar's worth of horse energy spent in dragging the roads. The whole region inhaled new hope. This year a stone road will bisect the township in one day. The man who dragged is being religiously done. Thus has new life and energy been put into a whole community.

Great Britain's absolute supremacy

of the sea is beyond question; and the superiority of the allies in men, money and munitions is not to be challenged. Lord Northcliffe declares that in his six visits to the front as has always been struck by the splendid health, excellent equipment and absolute confidence of the French soldier. He was also impressed by the immense number of men in reserve, covering miles and miles of ground and by the quantities of munitions deposited everywhere. In only one department has the German any pretension to superiority. The Prince of the Power of the Air, which is another name for His Britannic Majesty, is getting too much of his own way in what the Kaiser would probably now call "his element." While the wounds inflicted by the German aircraft so far have been by comparison with the damage done generally in the war, mere playthings, they suggest an infinite capacity for mischief when weather conditions are favorable, and unless the allies are taken to challenge their aerial supremacy. That the British government and people are not blind to the situation was shown in the past, when done to beat the Hun upon his own ground, if we may so call the circumambient air. But we have to "get a move on" and possibly the allies, which are intensely irritating to the British body and soul, may tend to accelerate our movement. The Teutons are not having it all their own way in the clouds by any means. Italian aeroplanes killed eight hundred Austrian soldiers in barracks at Lancia on February 10, and that makes up for the killing of many English civilians, men, women and children, by German Zeppelins.

The whole history of the war shows the potentiality of aircraft in warfare and the lesson is that for Great Britain the control of the air is as important as the control of the sea. It means nothing less than the creation of a second British navy to rule the winds as the first one does the waves. Great Britain cannot afford to be, and dare not be, inferior to any other country in aerial power. Our share in the war is a valuable lesson and rubbing it well in. We must not regard the cost of aerial squadrons as too high. The Zepplin and the present war. It is rather a permanent investment and one that will involve permanent expenditure for construction and maintenance. The present stage of aerial navigation aircraft of all kinds will tend to become obsolete in even less time than do the battleships. The Zepplin and the aeroplane may be as good as the day it is put into the scrap heap as the day it was built, just as many fine ships have had to be put on the retired list simply because something better has been devised. It is just the same with the control of the air. Plants, machines are thrown out, not because they have lost anything of their original efficiency, but they cannot compete with the newer, later invention and improved type. For Great Britain the best and most up-to-date of aerial warfare will always be the one of the most possible. The discarded machines may find new spheres of usefulness in the paths of peace. It will be passing strange if the enormous possibilities in the way of aerial navigation demonstrated by the war do not result in a great utilization of dirigibles and aeroplanes for commercial purposes. They are not likely to compete seriously with the railways and steamships for the heavy freight traffic, but special fields of usefulness can certainly be found for them.—Henry Dalby, in Montreal Star.

No Halfway House

This war must be either a great triumph or a complete disaster for the German military caste, in which is included the Kaiser and all that counts in the civil government of Germany. There is no halfway house for the time being. There is peace without plunder, a peace which compelled them to return to the status quo and left them to pay even their own share of the bill and impose the \$200,000,000 of new taxation, which would be necessary for this purpose, would discredit them hopelessly, and lead inevitably to their downfall. Whatever words they may use about it, the German people know in their hearts that this was an aggressive war, and that they were enlarging the territory and increasing the power of their state; and if it turned out in the end that they had been thrown back into their own territory and had succeeded merely in defending themselves at immense cost and sacrifice, their anger with their leaders would be unbounded.—Westminster Gazette.

ing Hereabouts**

S. S. Beebe arrived from New Jersey on Tuesday, and will spend the summer months in Monitor.

Mrs. Covert of Superior, Michigan, is visiting her sister, Mrs. S. English. Mrs. Covert is on her way home after spending the winter in B. C.

The change in the train service will no doubt be appreciated by all those who have occasion to travel around this part of the map.

Mr. and Mrs. W. F. Morehead of the North Slope ranch, were the guests of Mr. and Mrs. Marshman on Sunday.

Homestead Inspector Creighton was in town for a few days this week.

Mr. and Mrs. R. S. Meiklejohn and Messrs. Bowler and Wiltse of Consort were week end visitors at the home of Mr. and Mrs. Marshman.

Jack Tkachanko of the 218th Battalion is home on leave. Jack makes a fine looking soldier and will no doubt give the Huns something to worry about.

W. H. Martin and H. McMorris of the local bank, were week end visitors at the Poynter ranch.

The Monitor school is still closed as no teacher has been secured to take J. F. Robinson's place.

Three of our well known citizens went out for a joy ride on Monday. Having forgotten to take sufficient coats with them they were pretty blue from the cool breezes at eventide, as it was around ten o'clock when they returned to the burg again. Guess they must have misjudged the distance alright.

H. M. Kechnie journeyed to Wilkie, Saskatchewan, during the Easter holidays.

Dr. Mecklenburg, the reliable graduate optician, will be in Monitor on Monday, May 15th.

R. D. Sprague received a letter from Geo. Cutts during the week. George has joined the 202nd Battalion and is now in Edmonton.

Martin Thompson and family were visitors at the Gregerson home on Easter Monday.

Hogs are now worth 10 cents per lb. in Monitor.

Regular meeting of the Ladies Aid was held at the home of Mrs. W. MacKenzie on Wednesday. The ladies are busy preparing for a sale of work.
